## ENHANCED AIRBORNE PATHOGEN DEFENSE SYSTEM

# 100% PEOPLE SAFE GERMICIDAL UV SOLUTIONS

### KEY PRODUCT FEATURES, DETAILS & SPECS

- Engineered with the latest in UVC germicidal technology to inactivate bacteria, mold & viruses
- Integral SilentAire fan system draws in ambient air to help continuously facilitate air disinfection
- A sealed internal UVC LED germicidal disinfection chamber ensures zero direct UVC exposure
- 100% safe for use while the space is occupied (with no special controls, safety measures or training req'd)
- Green indicator light lets you know that the SilentAire GUV disinfection system is operational
- SilentAire fan system returns the UVC treated & disinfected air back into the space
- Ambient LED 4000K performance equal to 15W @ 1,996 lumens (20W SilentAire system wattage)
- Ambient LED up to 133 LPW provides 60+% in energy savings vs. legacy flushmount luminaires
- Installs like any LED flushmount, no special installation steps required, simply 'plug & play'
- Includes our innovative contractor friendly TwistFit system, installs in 2-minutes or less
- ColorPreference® field selectable 3-CCT for added design flexibility (3000K, 4000K & 5000K)

## SILENTAIRE SYSTEM OVERVIEW

ETI SSL's SAFM-R16 SilentAire UVC 16" Round Flushmount is a hybrid lighting solution that combines traditional LED ambient illumination with SilentAire's internal ultraviolet germicidal air disinfection system that does not allow any direct exposure to UVC. No specialized controls, safety measures or training required. All SilentAire products are 100% 'People Safe' when in use and the space is occupied vs. direct UVC solutions that can be a health and safety risk if not properly operated.

SilentAire products are engineered with an integral quiet fan system designed to continuously funnel contaminated ambient air through an internally sealed UVC germicidal disinfection chamber. UVC technology is proven to effectively kill or inactivate many types of bacteria, mold, fungi and viruses. The system then returns pathogen free air back into the occupied space.

Simply install SAFM-R16 products like any traditional LED flushmount luminaire with 'plug & play' operation to help create safer people spaces against airborne pathogens. Pair with additional SilentAire and CleanAire™ germicidal solutions to build an enhanced defense system against current and future pathogens.

## 100% PEOPLE SAFE GERMICIDAL UV AIR DISINFECTION\*\*

1. Integral fan & the space's HVAC system helps to funnel in contaminated ambient air
2. Fully enclosed UVC disinfection chamber kills or inactivates pathogens & viruses
3. Pathogen free air is returned to the space, helping to increase air changes per hour

## GERMICIDAL UV LED SPECTRUM DETAILS

- GUV (Germicidal Ultraviolet) is an effective and proven disinfection technology in use for over 35-years
- The short ultraviolet wavelengths in the photobiological band "UVC" is ideal in eliminating pathogens
- The UVC range is outside the visible spectrum of "light" that can quickly kill bacteria & inactivates viruses
- Thanks to its fast germicidal efficacy, GUV within the UVC range is great for air & surface disinfection
- Germicidal effectiveness is set by the exposure dosage in irradiance & time (how much & how long)
- Direct exposure to GUV within the UVC range can be a safety & health hazard to both the skin & eyes
- SilentAire's sealed germicidal UVC chamber eliminates direct exposure & is 100% people safe when in use
