The power of Plasma Technology for protection against viruses and bacteria.

Innovation

At ETi we are dedicated to developing innovative products that put your health and safety front and center. Innovation is the heart of everything we do. Our comprehensive portfolio of LED lighting products now includes a full line of disinfection lighting products. We're pioneering the introduction of UVC and Plasma Technology within lighting solutions, so together we can create spaces that continuously treat the air while occupied.

Fundamentals

There are three commonly encountered states of matter: solid, liquid, and gas. When a solid is heated, it transforms into a liquid and then from a liquid into a gas. If enough energy is applied to gas, it becomes an ionized gas known as plasma, which represents the fourth fundamental state of matter. The plasma contains reactive chemical species such as electrons, ions, neutral molecules, and atoms.

Technology

Our second generation of SilentAire fixtures utilize non-thermal “cold” plasma. SilentAire luminaires will use an internal circulation system to push and disperse plasma from our patent-pending plasma generator, filling the space with positive and negative ions that neutralize harmful pathogens, pollutants, and even odors.

ETi’s plasma technology continually and proactively treats the air in occupied spaces at the source of contamination.

Technology that works for you

Space Treatment

Providing a full range of comprehensive disinfection solutions to actively kill germs in residential and commercial applications.

Complete Care

Rooms can stay occupied while the lighting fixture is working in disinfection mode. Providing a safe space to shield your home, office, or business.

Full Protection

State-of-the-art integrated circulation system for larger spaces, providing lighting options while continuously disinfecting the air.

Plasma Technology

Innovative integration of effective Plasma technology with LED lighting. Plasma ions disperse to actively kill airborne viruses and bacteria.

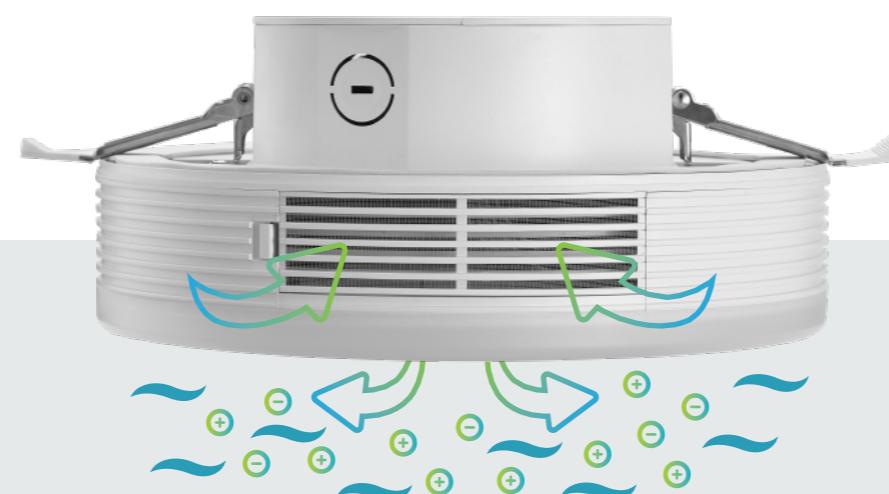

Live Safer, Healthier, and Easier

A hybrid lighting and air solution with a quiet built-in circulation system allows for use in occupied spaces with plug and play technology.

Kills up to 99.9% of Viruses and Bacteria

Plasma has 99.9% removal rate against SARS-CoV-2 the virus that causes COVID-19, Influenza A virus H1N1: A/PR/8/34, and Staphylococcus albus after 2 hours of use. Check product information for exact product testing.

Airborne particles are charged by the ions released by the plasma generator, causing them to cluster, be drawn to the plasma and destroyed.

This ionized air that contains positively and negatively charged molecules attract and kill airborne germs on contact.

Odorous gases and aerosols oxidize on contact with ions and are neutralized as well.

High output LED lighting with active plasma disinfection technology

Every home or office can treat their air with integrated lighting.

Increasingly, we spend more time indoors, such as working from home or back at the office, schools, and shopping. Many of these places are troubled with harmful germs that float through the air, like the flu and pneumonia. These can be rendered harmless through air disinfection. These illnesses that are easily transmitted via the air can be minimized and the overall air quality can be improved with ETi's SilentAire solutions.

Incorporated right into your lighting, our fixtures can clean and recirculate treated air back into your space.

UVC and Plasma Technology

Flat Panels

Flat panel lighting with air disinfection treatment

The SilentAire flat panels combine traditional ambient illumination with two sealed internal UVC lamps and Plasma Technology generator. Sealed internal UVC disinfection chamber ensures zero direct UVC exposure. An extremely quiet circulation system pulls in ambient air and recirculates back purified air while releasing plasma ions to attract and kill viruses and bacteria on contact. No special installation steps are needed to install and use SilentAire fixtures. Install as a regular luminaire and control the lighting and fan system by wall switch.

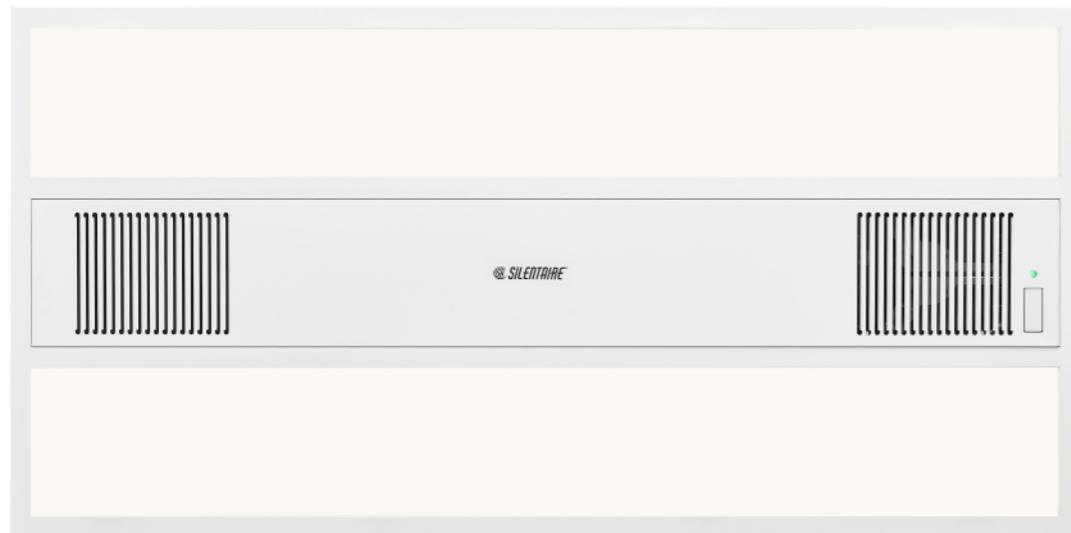

Ideal Applications

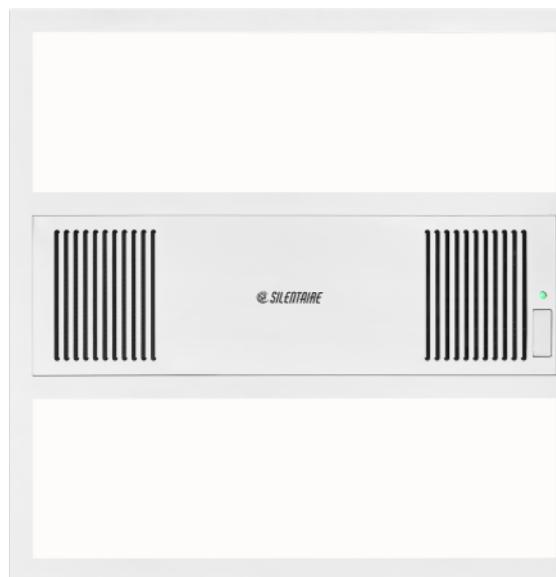

Office, Education, Commercial, Retail, Transportation, Healthcare

UVC with Plasma Air Disinfection Flat Panels

High output LED lighting with UVC & Active Plasma Treatment Technology

2'x4'
Model # 559041110
Part # SAFP-24-LB4-8-CP4-MV-LVD

2'x2'
Model # 558101120
Part # SAFP-22-LB4-8-CP4-MV-LVD

*Tested by Innovative Bioanalysis in 8'x8'x10' Biosafety level 3 chamber with a UVC with Plasma Air Disinfection 2'x4' Flat Panel. Removes 8.49×10^6 TCID50/mL of SARS-CoV-2 to 1.68×10^2 TCID50/mL after 2 hours of operation, 99.998% virus gross reduction achieved.
Tested by ILAC against Staphylococcus albus 8032 bacteria.
Removed 99.9% of the bacteria from the air within 2 hours.

LED Lighting

Size	Lumens	Watts	Color Temperature	CRI	Voltage	Dimming	Rated Life	CFM

LUMENBOOST®

Active plasma air disinfection technology to incorporate into your established lighting

We aim to clean your air through new lighting or adding to existing fixtures.

At ETi we understand not every space will need to install new lighting. We've developed air solutions that can incorporate existing fixtures or simply add our patent-pending plasma air disinfection to commercial and residential buildings.

As with the rest of our line, these fixtures are installed like any traditional luminaire and controlled by wall switch.

SilentAire Plasma Technology

Universal Ceiling Mount

Ceiling mount system with air disinfection treatment

The SilentAire universal ceiling mount system allows an existing traditional surface mount 3.5/4" J-box fixture become an air purifier. An extremely quiet circulation system pulls in ambient air and recirculates back purified air while releasing plasma ions to attract and kill viruses and bacteria on contact.

The universal ceiling mount system can be used as a stand alone fixture or with any flush/semi-flush mounted lights in multiple styles.

Ideal Applications

Food Industry, Office, Education, Healthcare, Hospitality, Residential, Commercial

Plasma Air Disinfection 12" Universal Ceiling Mount System

Active Plasma Disinfection Technology

Model # 559051000
Part # SAFM-UCM-R12-PL-MV-WH

Kills 99.9% of airborne viruses and bacteria*

System can hold any standard 3.5/4" J-box compatible ceiling flush or semi-flush mount fixture up to 22lbs.

*Virus test by intertek against Influenza A Virus H1N1.
Bacteria test by ILAC against Staphylococcus albus 8032.
Removed 99.9% of the virus and bacteria from the air within 2 hours.

Tested by ILAC against Staphylococcus albus 8032 bacteria.
Removed 99.9% of the bacteria from the air within 2 hours.

Disinfection Solutions by ETi Solid State Lighting

WARNINGS AND PRODUCT TESTING

UV-C radiation is harmful for eyes and skin, therefore people and animals should always avoid direct exposure to UV-C. When installing the lamps make sure the instruction manual of the device is followed and lamps are not switched on during installation.

Read product instruction manuals for more information.

Flat Panels

Model # 559041110

*Tested on SARS-CoV-2 (the virus that causes COVID-19) with one fixture for 2 hours in a 640ft³ (10'x8'x8') chamber. Removed 99.99% of SARS-CoV-2 from the air. Tested on Staphylococcus albus 8032 with one fixture for 2 hours in a 30m³ (1059 Cubic ft.) chamber. Removed 99.9% of Staphylococcus albus 8032 from the air. Not proven to prevent the transmission of COVID-19. No air treatment device can guarantee the prevention of virus transmission. We recommend following CDC guidelines.

Model # 558101120

*Tested on Staphylococcus albus 8032 and Influenza A Virus H1N1 with two fixtures at high speed mode for 2 hours in a 20m³ (706 Cubic ft.) chamber. Removed 99.9% of Staphylococcus albus 8032 and Influenza A Virus H1N1 from the air. Not yet tested on SARS-CoV-2 (the virus that causes COVID-19). Not proven to kill SARS-CoV-2 or prevent the transmission of COVID-19. No air treatment device can guarantee the prevention of virus transmission. We recommend following CDC guidelines.

8" Downlight

Model # 559011010

*Tested on Staphylococcus albus 8032 and Influenza A Virus H1N1 with two fixtures at high speed mode for 2 hours in a 20m³ (706 Cubic ft.) chamber. Removed 99.9% of Staphylococcus albus 8032 and Influenza A Virus H1N1 from the air. Not yet tested on SARS-CoV-2 (the virus that causes COVID-19). Not proven to kill SARS-CoV-2 or prevent the transmission of COVID-19. No air treatment device can guarantee the prevention of virus transmission. We recommend following CDC guidelines.

12" Flush Mount

Model # 559031110

*Tested on SARS-CoV-2 (the virus that causes COVID-19) with two fixtures in high speed mode for 2 hours in a 18m³ (600Cubic ft.) chamber. Removed 99.99% of SARS-CoV-2 from the air. Not proven to prevent the transmission of COVID-19. No air treatment device can guarantee the prevention of virus transmission. We recommend following CDC guidelines.

Cambered and Cone Pendants

Model # 547061010, 547061020, 547051010, 547051020

*Tested on Staphylococcus albus 8032 and Influenza A Virus H1N1 with three fixtures at high speed mode for 2 hours in a 10m³ (353 Cubic ft.) chamber. Removed 99.9% of Staphylococcus albus 8032 and Influenza A Virus H1N1 from the air. Tested on SARS-CoV-2 (the virus that causes COVID-19) with three fixtures in high speed mode for 2 hours in a 10m³ (353 Cubic ft.) chamber. Removed 99.9% of SARS-CoV-2 from the air. Not proven to prevent the transmission of COVID-19. No air treatment device can guarantee the prevention of virus transmission. We recommend following CDC guidelines.

24" Round Air Purifier

Model # 559061000 & 559061010

*Tested on Staphylococcus albus 8032 with one fixture for 30 minutes in a 30m³ (1059 Cubic ft) chamber. Removed 99.9% of Staphylococcus albus 8032 from the air. Tested on SARS-CoV-2 (the virus that causes COVID-19) with one fixture for 2 hours in a 22'x11'x8' (1280 Cubic ft) chamber. Removed 99.9% of SARS-CoV-2 from the air. Not proven to prevent the transmission of COVID-19. No air treatment device can guarantee the prevention of virus transmission. We recommend following CDC guidelines.

12" Universal Ceiling Mount System

Model # 559051000

*Tested on Staphylococcus albus 8032 with two fixtures in high speed mode for 2 hours in a 20m³ (700 Cubic ft.) chamber. Removed 99.9% of Staphylococcus albus 8032 from the air. Tested on Influenza A Virus H1N1 with three fixtures in high speed mode for 2 hours in a 20m³ (700 Cubic ft.) chamber. Removed 99.9% of Influenza A Virus H1N1 from the air. Not yet tested on SARS-CoV-2 (the virus that causes COVID-19). Not proven to kill SARS-CoV-2 or prevent the transmission of COVID-19. No air treatment device can guarantee the prevention of virus transmission. We recommend following CDC guidelines.
